

TATTOO AFTERCARE

Look after the work.

Follow the instructions given at your appointment. Good hygiene helps support healing and reduce the risk of infection.

01

Remove the wrap

Remove the temporary wrap after **one hour**, unless Keileigh has given you different instructions for your dressing.

02

Wash and dry

Wash your hands first. Gently clean the tattoo using warm water and a mild, unscented antibacterial soap. Rinse and **pat dry** with clean paper towel.

03

Moisturise

Keep the tattoo clean. When it feels dry, apply a small amount of your studio-supplied aftercare product or **Bepanthen**, as instructed.

For the first two weeks

- Avoid swimming and soaking the tattoo.
- Avoid sunbeds and direct sunlight.
- Do not use scented soaps or other chemicals on the area.
- Do not scratch, pick or pull at scabs.

What to expect

The tattoo may become **dry, itchy and scabby** during the first week or two. Allow the scabs to come away naturally while the skin continues to heal.

If anything concerns you, send the studio clear photographs on WhatsApp before visiting.

Touch-ups and help

One free touch-up is available once the tattoo has fully healed. Contact the studio in advance to arrange it - please do not arrive without an appointment.
